

starches break down to sugar

enzymes

The chemicals break down materials into sugars

break down starches

Complex sugars

Starches

The nutrients broken down into sugars

OO
OO
OO

Sugars

enzymes break down the sugars.

extracellular digestion

OOOOOO

Fungi use form of sugar for energy, food, sugar = nutrient, are absorbed

process of breaking down starts off with release of enzymes

are a form

nutrients

Chemicals that supply fungi with food/energy

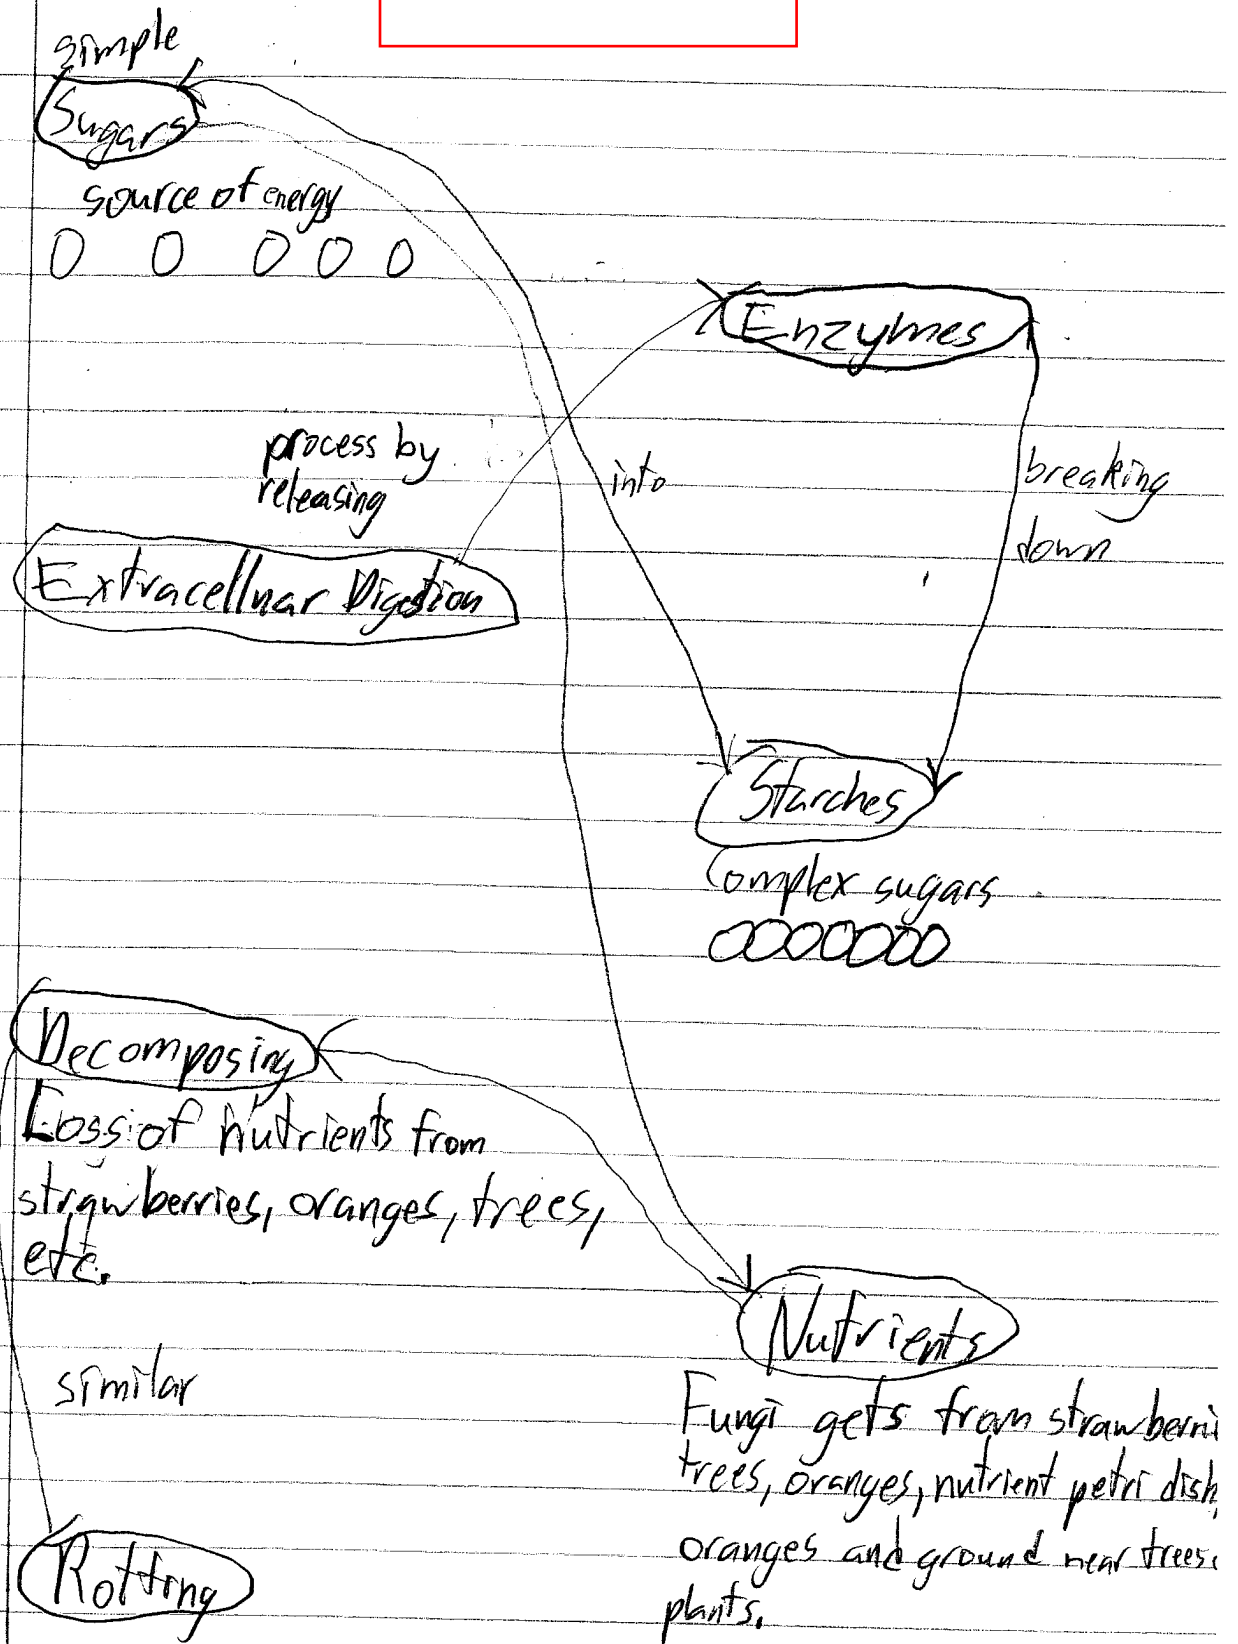

decomposing

Breaking down organic materials

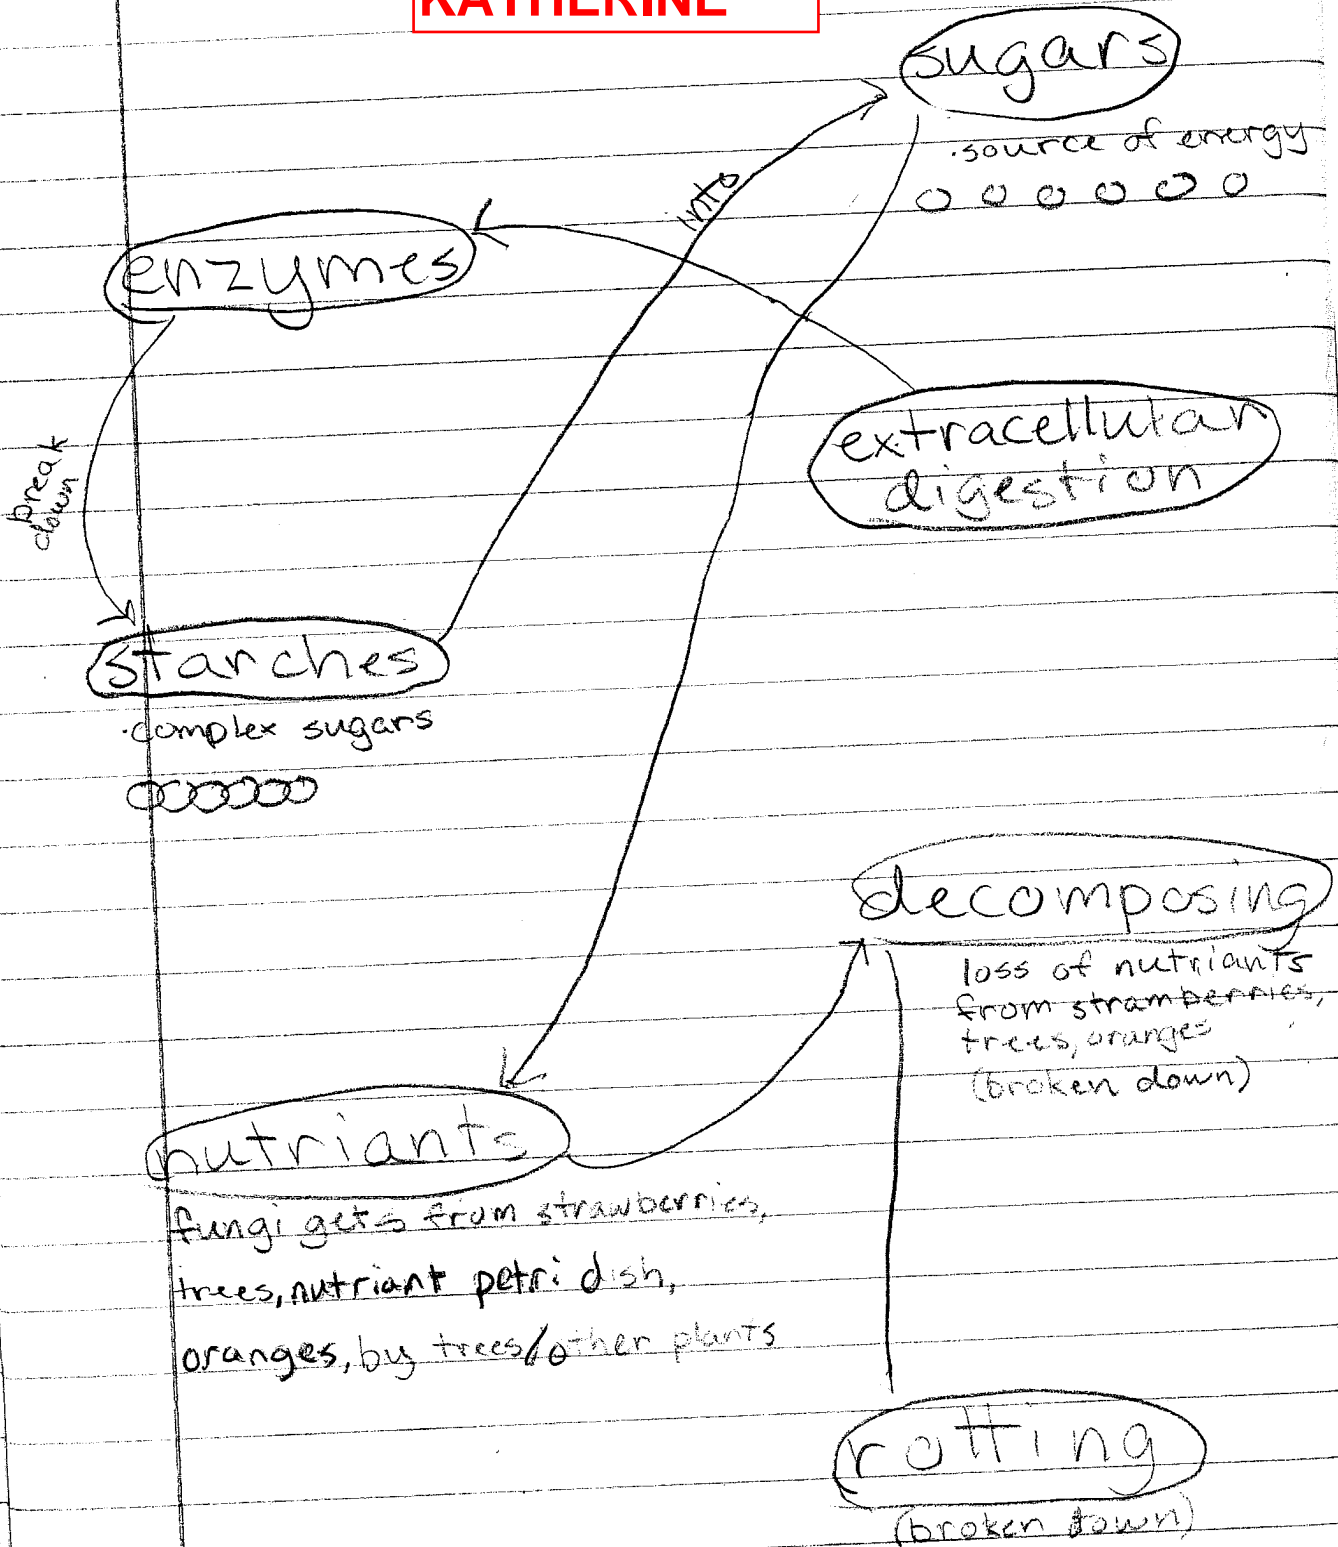

rotting

describing some process caused by extracellular digestion.

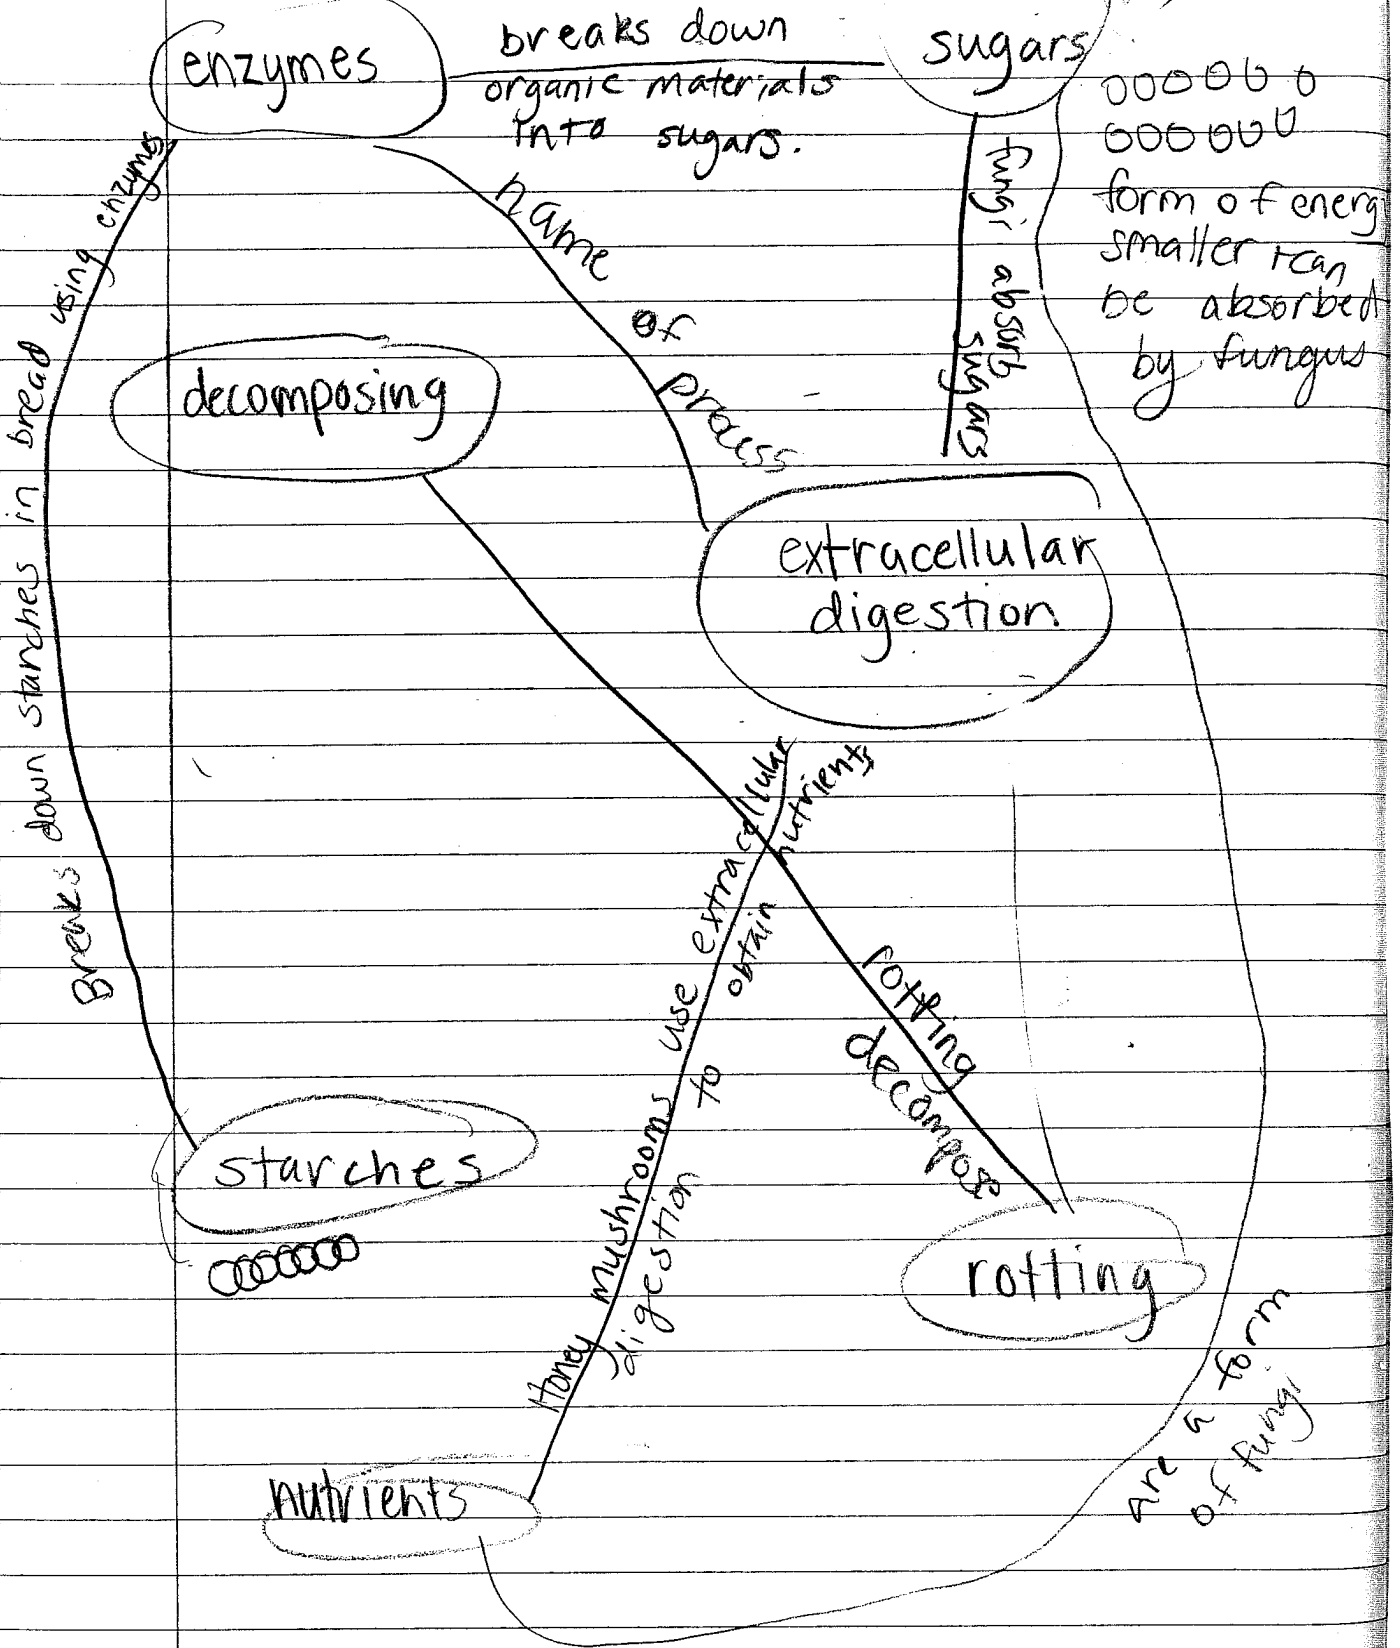

rots materials to absorb sugars.
